

SITE NAME:	ALCOA
SITE NUMBER:	0000040
ADDRESS:	3131 E Main Street
CITY:	Lafayette
COUNTY:	Tippicanoe
SCORE:	19.44
SCORE DATE:	December 1990
CONTAMINANT TYPE:	Polychlorinated Biphenyls (PCBs)
MEDIA AFFECTED:	Soil and Sediments
CONTACT PERSON:	Mark Jaworski at (317) 233-2407
LAST REVISED:	December 2003
SITE PHOTO	
<p>STATUS: ALCOA used PCBs in its industrial process from 1950s through the 1970s. PCBs were documented at the property in soil, equipment, and wastewater treatment facility. PCBs were documented to be discharged from the facility to Elliot Ditch. The ditch has a Level 5 Fish Advisory cautioning that no fish should be consumed from the designated waterway. In the late 1990s, ALCOA addressed soils, catch basins, equipment, and treatment facilities, removing most of the PCB sources. The United States Environmental Protection Agency and ALCOA remain in litigation about the amount and extent of remediation efforts.</p>
